SUMMARY

Artificial Intelligence student at Cairo University with hands on experience across machine learning, full-stack development, and digital fabrication. Proven track record of high academic achievement, competitive problem solving, and technical leadership from ranking 1st at Helwan University to leading workshops at FabLab Egypt. Adept at engineering scalable software pipelines, IoT systems, and CAD designs to solve real world technical challenges.

EDUCATION:

Cairo UniversityB.S. in Artificial Intelligence & Computer Science

- Current Status: Junior (3rd Year) | GPA: 3.15

Helwan UniversityB.S. in Computer Science (Freshman Year) | Transferred 2024

- GPA: 3.82 | Academic Honor: Ranked 1st out of 1,000+ students

STEM Maadi School for GirlsHigh School Diploma | Graduated July 2023

- Selected for Egypt's top 1% STEM program for high-achieving students

EXPERIENCES:

FabLab Egypt

Lab Coordinator

September 2026 – Present

- Manage laboratory maintenance and equipment operations.
- Design curricula and lead hands-on workshops in 3D printing and laser cutting.
- Spearheaded the introduction of textile digital fabrication; created and lead the official sewing machine training program.

Makerspace Intern

August 2026

- Mastered digital fabrication tools, including 3D printers, laser cutters, and traditional crafting equipment.

Egabi Solutions | SAP ABAP & MM Intern

July 2026

- Developed custom ABAP code and programs.
- Completed cross-functional training in SAP Materials Management (MM).
- Handled Special Procurement Processes, including standard, subcontracting, consignment, consumable, and service procurement.

Digital Egypt Pioneers Initiative (DEPI)

AI & Machine Learning Trainee

January 2026 – June 2026

- Completed intensive technical training on practical machine learning models and data pipelines.

Full-Stack .NET Developer Trainee

October 2024 – June 2025

- Developed scalable full-stack web applications using the .NET framework.

Konecta | AI & Machine Learning Intern

July 2025 – January 2026

- Completed a comprehensive 6 month professional program focused on real-world AI applications and continuous learning.
- Collaborated with cross-functional teams to design and implement a graduation project demonstrating practical machine learning solutions.

Optimized corporate network security by configuring firewalls and VoIP servers to ensure seamless communication.

- Managed the end-to-end device deployment lifecycle for end-users, including hardware setup and serial code management.
- Partnered with senior IT engineers to troubleshoot daily technical tasks and maintain infrastructure reliability

TECHNICAL PROJECTS & COMPETITIONS:

HERE Technologies Hackathon | Geospatial Pipeline Developer

Feburary 2026

Engineered a full geospatial pipeline within a 3-day intensive sprint using GIS systems.

- Optimized system performance and debugged complex code under strict time constraints to deliver a functional solution.

IoT System for Environmental Conservation: Developed an Arduino based system using ESP32 and specialized sensors to monitor marine life impact. Directly addressed two Egyptian Grand Challenges by leveraging technology for environmental conservation and climate change assessment.

Finology Competition (Central Bank of Egypt) | Co-Developer Smart Budgeters

2025

- Co-developed a digital financial literacy tool to promote financial inclusion among Egyptian youth.
- Engineered "Hakeem Feloos," an interactive AI chatbot providing personalized financial guidance.
- Implemented automated features for income tracking, goal-setting, and visual spending analysis using interactive charts.

IEEE Robotics and Automation Society (RAS) | Member

2024

- Completed technical tracks in SolidWorks (Mechanical Design) and Arduino C (Control Systems).
- Developed a multi-phase competition robot designed for autonomous ball collection, competitive matching, and precision striking.

1st Place: Scratch Creative Programming Olympiad.

Winner: Governorate Phase, Microsoft Office Specialist (MOS) World Competition.

LEADERSHIP & VOLUNTEERING

AIESEC Global Volunteer

August 2025 - September 2025

Borderland, Sri Lanka

- Instructed 90+ participants in Origami workshops and led outdoor/water-based camp activities.
- Developed strong communication and leadership skills in a challenging international environment.

YLY

- One year of volunteer work with Youth Leading Youth (YLY), an organization under the Egyptian Ministry of Youth and Sports.

SKILLS

Technical Skills

- Programming Languages: Python, C, C++, C#
- Web & Databases: HTML, CSS, SQL
- CAD & Hardware Design: SolidWorks, Fusion 360

Soft Skills

- Problem Solving & Critical Thinking
- Communication & Analytical Abilities
